30MHz-6.0GHz 50-50 Watt Dual Band Solid State Amplifier

MAIN FEATURES

- Class A Operation
- 100% Mismatch tolerant with no foldback
- Calibrated Dual Directional Coupler
- Ethernet, USB, RS232 & GPIB Interface
- 5 Year Warranty

The AS30M6G series of dual-band solid-state power amplifiers follow the MILMEGA tradition for compact, upgradeable microwave power amplifier solutions with field-proven reliability. A modular design enables easy in-country service, maintenance and factory upgrades to higher power models.

Developed to cover the frequency band 30MHz- 6GHz this GaN-based amplifier produces high P1dB performance with excellent linearity and low harmonics making this series ideal for multiple applications including various EMC standards, Telecoms and Instrumentation testing.

Powered from a switched-mode power supply for high efficiency, high power factor and wide voltage range operation. The unit is air-cooled with integral fans and is protected against faulty cooling by excess temperature sensing. A safety interlock connector is provided, which the user can short circuit to ground, to put the amplifier into standby mode. Front panel indicators are provided to indicate over-temperature and RF interlock conditions.
