## OLP-35V2, OLP-35SC and OLP-38V2

SmartPocket™ V2 Broadband Power Meters

VIAMI Solutions new OLP-3xV2 Broadband Power Meters quickly, easily, and conveniently measure optical power levels and loss in fiber networks and fit perfectly in your pocket. Easy-to-use for technicians at any skill level SmartPocket V2 Broadband Power Meters (PM) complement VIAMI optical light sources (OLS) for insertion loss and continuity testing in both multimode and single-mode networks in all environments. They offer a dedicated and cost-optimized solution for testing and troubleshooting fiber in the field. The smart and rugged OLP-3xV2 also includes unprecedented data storage capacity supported by result downloads to a PC or upload to the cloud.

OLP-35V2

OLP-35SC

OLP-38V2

### Key Benefits

- Ready when you need it – ultra-high reliability and high availability
  - Dependable, German design
  - Designed with outdoor environment in mind
  - Over 70 hours continuous use
  - Instant On – no boot time
- Easy to use
  - High-Visibility backlit graphical display with context-sensitive softkey
  - No setup 'OptiChek' measurement mode
  - Auto- $\lambda$ , Multi- $\lambda$  mode
  - Automatic upload of results via VIAMI Mobile Tech application

### Key Features

- 1 nm incremental wavelength settings
- Universal optical interface supports all 2.5 mm with option for 1.25 mm connectors
- Fiber Tracing – detecting optical light source tone(s)
- Storage for > 1000 test results and PC download capability
- Bluetooth low energy connectivity to the VIAMI Mobile Tech App
- 3-year recalibration period

### Applications

- Measuring optical power levels and link insertion loss for both Single mode and Multimode networks
- Network Build and Maintenance for
  - Enterprise/LAN
  - Access and Metro (LAN/WAN)
  - FTTx (e.g. Home/Antenna)
  - Standard and high-power level tests

## Features and benefits

### Ultra-reliable German design

Built for rugged, outdoor use  
Still fits in your pocket!

### Improved protection cap can be fully opened

### Huge storage capacity

> 1000 test results

### Softkey flexibility

### Multiple power options (4-way)

2x Alkaline AA, 2x NiMH AA  
rechargeable, AC power adapter, USB

### Bluetooth low energy connectivity to the VIAVI Mobile Tech App

### New high-visibility graphical display with backlight

### Innovative low-power design exceptionally long battery life over 70 hrs. continuous operation

### USB-C interface powering, offload of results, connection to PC

## Products:

- The OLP-35V2 is the optimal device for standard telecommunication networks and multimode or single mode applications
- The OLP-35SC provides the same capabilities as the OLP-35V2 and comes with a fixed SC adapter
- The OLP-38V2 is a higher-power (up to +26 dBm) version for CATV HFC (with analog RF transmission) or amplified DWDM systems applications

## Instant On – Easy to use – Good to go in no time

Instant on means SmartPocket V2 is ready as soon as you are, no waiting for an instrument to boot up, it's there the instant you need it. A high visibility back-lit display makes SmartPocket V2 usable in all lighting conditions indoors and outdoors, and combined with the super simple user navigation plus universal optical connector test port with OptiChek mode means you can close out more jobs per day.

## OptiChek Mode

A broadband power meter that does not require wavelength configuration! Ideal for situations where you do not know the exact service wavelength in use or for a basic quick check to determine if a fiber is lit and power level is in the predicted/expected range. Just turn it on, connect, and take the measurement.\*

\* Increased uncertainty (to approximately +/- 1dB) is traded for speed and simplicity when you just want a quick confirmation of power with no thresholding, for Singlemode only: (1260nm to 1650nm)

## Auto-λ, Multi-λ Mode

When SmartPocket V2 Broadband PMs are used in combination with SmartPocket V2 OLS, the new super-fast Auto-λ mode reduces the time to measure up to 3 wavelengths on the same fiber to less than a second. Delivering lightning-fast, error free, multi-λ loss testing saves time when testing and becomes critical to getting jobs finished and links delivered on time especially when working in high fiber-count environments. Plus, with a single button push results are saved and ready for upload to the cloud via the Mobile Tech App.

## Robust and ready for field use

One of the key issues for optical field equipment is the risk of damage to the optical test port, this port has to be free of dirt and damage (e.g. scratches) in order to perform as required (according to specs). All it takes is a small piece of dust or dirt to be accidentally trapped and crushed when a fiber connection is made to damage the test port. The non-contact and easy clean approach with the SmartPocket V2 eliminates the risk of accidental test port damage and the integrated rubber bumpers and test port cap make it ready for use in the real world and able to survive the odd bump or knock.

## Superior Battery Life and powering options

Taking measurements and performing that certification of a fiber install is the final step to closing out tasks while you are still on-site. Without test equipment powered and ready to go you run the risk of missing a deadline or having to make a site re-visit to finish a job. To avoid this the SmartPocket V2 boasts an industry leading 70 hours of continuous operation and supports 3 way powering with field replaceable NiMH rechargeable, off the shelf alkaline batteries and AC powering. Meaning that you will never be short of power for long or have to wait for unit batteries to recharge.

## Low Cost of Ownership

3 years calibration interval means no extra annual charges and your equipment will meet requirements for reporting and certifying (i.e. to be in calibration).

## Test and Report Field Measurements

VIAVI Smart Reporter reporting software lets users quickly and efficiently download test results data from the power meter's memory with just a few clicks. After it's downloaded, the software reporting functions let users generate and customize professional certification reports.

## Connected for superior workflow and reporting

In today's world it is essential for techs and their instruments to be connected, not only to reduce manual effort and risk of mistakes but also to deliver seamless reporting. SmartPocket V2 is integrated with the VIAVI Mobile Tech App to ensure optimal workflow freeing up techs and contractors to get on with their jobs rather than being slowed down with report generation and submission.

The screenshot shows a professional report from VIAVI. It includes the company name (Technician AG), technician name (Mr. Technician), address (Technician Street, 72764 Reutlingen, Baden-Württemberg, Germany), phone number (0163438574), and email (technician@office.com). The report date is Thursday, January 14, 2021. The device type is OLP355C/14, calibration date is 2021/JAN/12, serial number is A-0443, and software version is 2333V01.00.00. The measurement results table is as follows:

Fiber ID	λ [nm]	Power [dBm]	Power [μWatt]	Power [dB]	Reference [dBm]
2021-01-14T15:42:46	1310	-20.52			
2021-01-14T15:43:46	1310	-20.82			
2021-01-14T15:43:59	1310		11.22		
2021-01-14T15:45:01	1490			-19.80	0.00
Room-03, Fiber-001	1490			36.15	-56.37
Room-03, Fiber-002	1550	-22.86			
Room-03, Fiber-003	1550	-23.09			

## Mobile Tech App:

Operate Instruments and Execute App to App Sharing with a Mobile Device

- Synchronization to StrataSync – firmware updates and asset management
- Mobile App – IOS and Android
- App to App sharing to any compatible App
- Test device and mobile device file management
- Enriches test results with workflow audit details –geolocation data, time stamp, and multimedia attachments (pictures, signature capture)

## Inspect Before You Connect (IBYC)

Contamination is the number 1 reason for troubleshooting optical networks. Proactive inspection and cleaning of fiber connectors can prevent poor signal performance, equipment damage, and network downtime.

## VIAVI Care Support Plans

Increase your productivity for up to 5 years with optional VIAVI Care Support Plans:

- Maximize your time with on-demand training, priority technical application support and rapid service.
- Maintain your equipment for peak performance at a low, predictable cost.

Contact your local representative for more information on VIAVI Care Support Plan options or visit:
